

PROGRESS REPORT OF THE GEOGRAPHIC AREA, CRR

MONTH OF FEBRUARY 1957

OFFICE OF THE CHIEF, GEOGRAPHIC RESEARCH

A. Accomplishments and Coordination Activities

1. High production levels were attained during the month in the Geographic Research Area. Compared to January, twice as many reports and 30% more maps were disseminated. A new February record for servicing map requests was recorded. Major attention continues to be given to the preparation of Unconventional Warfare and photo intelligence studies, and to the evaluation of Soviet operations in Antarctica.

2. The Cartography Division completed 98 maps and charts, of which 92 were for CIA, 4 for the Air Force, and 2 for the Department of State. Of note during the month was a map prepared for Vice President Nixon's trip to Africa. Requests were accepted for 79 maps and charts -- 74 for CIA, and 5 for the Department of State. The NIS Map Coordinator received 8 color proofing jobs and 2 final NIS maps from reproduction, leaving 8 color proofing jobs and 39 NIS maps for final printing. The Special Support Branch completed 42 projects during the month and accepted requests for 30; in addition, 11 revisions and reruns were accepted and completed.

3. The Map Library Division received 4,770 maps and 914 related publications from foreign sources. Of these, 33% were retained in CIA, 35% sent to Army Map Service, and 20% to the Library of Congress. The trend of ever-increasing activity in the Reference Branch culminated in a record level for February: 27,019 map sheets were disseminated in answer to 1138 requests. This represented a considerable increase over January, and a greater number of requests filled than in any month of 1956 except August.

4. The Photo Intelligence Division completed three Photographic Intelligence Memoranda [redacted] two reports neared the stage of final review and reproduction.

5. The Geography Division completed seven Geographic Intelligence Reports (G-15, The Soviet Arctic; GR-126.1, [redacted] (2nd report);

~~SECRET~~

and GR-145, An Appraisal of Soviet Plans to Remain in the Antarctic After the IGY and of the Reported Establishment of a Submarine Base; five G/E and G/I memoranda, and three G/S support jobs.

6. In conjunction with personnel of OSI and AFOIN, an ad hoc committee has been formed to coordinate all phases of interest of the intelligence community in the IGY program, operations and results. The committee will be broadened to include OO/C, Army, and Navy and will remain informal, advising the IAC as requested. [] Geography Division, is the ORR member on the committee.

25X1A9a

7. As a result of a decision reached at a JCS meeting held on 26 February, the Geography Division plans to complete the work on those areas of unconventional warfare projects [] which are currently under way, but to initiate no work on additional areas until the new, fully coordinated inter-agency list of selected areas has been agreed upon as a basis for planning.

25X1A2g

8. A briefing on Soviet intentions in Antarctica was prepared by the Geography Division for use by the DCI at an OCB meeting. As an outgrowth of an estimate prepared for ONE on the same subject, a draft memorandum was prepared at the DCI's request outlining suggestions for the augmentation of intelligence surveillance in Antarctica.

9. Frequent suggestions by the Geography Division that graphic material be included in Section 19 of NIS Chapters I for illustrative purposes has culminated in the approval of an ad hoc committee to study the question. The conclusions of the committee, selected by D/GC/C, will be presented to a Chapter I subcommittee.

25X1X4

10. An evaluation of [] results indicates that the generalist competence of some Agency personnel assigned to the project needs improvement. As it relates to ORR, the discrepancy has necessitated an injurious burdening of the geographers in GG/E. A memorandum outlining the problem and the means of its correction has been prepared for the AD/RR.

25X1Q11. An expansion of the cartographic orientation training course for [] was prepared during the month and will be first utilized in the briefing of []

25X1C

25X1C

12. The Area is devoting considerable thought to the problem of developing adequate intelligence coverage on Africa. Present ORR capabilities are very low, and a sharp increase in requirements is anticipated over the next year or two. Further study will be made and concrete proposals presented.

~~SECRET~~

13. Several Geographic Area personnel were welcomed into membership in the Career Service during the month by Acting Chief/G.

25X1A9a

14. [] Cartography Division, briefed personnel of the Reproduction Plants regarding his observations of map reproduction techniques in Western Europe.

15. The Chief of the Geography Division departed on 28 February to participate in the []

25X1X7

25X1X7

25X1A9a

16. [] of the Map Library Division started a 10-day trip [] to brief OO/C contact specialists on the requirements of the Geographic Research Area and to assist in the exploitation of several companies of interest.

MONTHLY REPORT FOR THE CARTOGRAPHY DIVISION

Month of February 1957

A. Summary of Cartographic Production and Accomplishments

1. During February the Cartography Division accepted requests for 79 maps and charts, 74 for CIA, and 5 for the Department of State. Of the total for the Agency, 16 were requested by ORE, 4 by OSI, 33 for CIA contributions to NIS, 2 for ORE, 1 for OSI, 15 for DD/S, and 3 for DD/P. The 5 maps requested from the Department of State involved 3 for NIS. During the same period, the Division completed 98 maps and charts, 92 for CIA, 4 for Air Force, and 2 for the Department of State. A larger size version of the self-initiated terrain map of the Middle East reported on last month was completed during February. During the month, 72% of the completions represented work on the USSR and Satellites, 7% on the Far East, and 13% on Europe-Africa and Near East. February was a month of higher than average completions. Of the 98 completed, 24 were for an NIE on Soviet Aircraft and 21 for ORE project 00.1616. At the close of the reporting period 14 items remained in reproduction representing a decrease from the previous two months.

2. The NIS Map Coordinator received 8 color proofing jobs and 2 final NIS maps from reproduction during February. Eight color proofing jobs and 39 for final printing remained in reproduction at the close of the month.

3. The Special Support Branch accepted requests for 30 new maps and charts and completed 42 during the month. In addition 11 revisions and reruns were accepted and completed during February. Of note during the month was a map requested for the Vice President in preparation for his trip to Africa.

B. Administrative Problems and Other Activities

25X1C

1. An expanded orientation training course for [redacted] has been proposed and will be offered to [redacted] 27-29 March 1957.

25X1C

2. [redacted] EOD in the Agency 25 February and will be assigned professional compilation duties in D/OS.

3. A request for approximately 120 reruns was received from D/OL during February to replenish depleted stocks. Fulfillment of this request will require a considerable number of man-hours.

25X1A9a

~~SECRET~~

Monthly Report for the Cartography Division - February 1957

25X1A9a

4. [] attended a demonstration of electro-luminescent panels presented by the Westinghouse Co., 14 ^{February} at the Shoreham Hotel. The potential use in lay-out tables was evaluated.

5. An evaluation of a new color book was given considerable attention by the senior staff of the Division.

6. [] briefed personnel in the reproduction plants during February regarding his observations of map reproduction techniques in Western Europe. These were made during his recent TDY.

7. Due to rejection by OBI of D/GC recommendations to improve the cartographic quality of the HIS Chapter I Summary maps, procedures for producing this series are being revamped to permit better utilization of professional man-hours in non-HIS efforts.

8. A semi-annual review of map and chart production in D/GC reveals that the Division has accepted requests at approximately the same rate as during the comparable period of FY 1956. Completions are higher indicating a reduction in the backlog. Reruns, processing, and service jobs are also higher this year, as is the work load of the HIS Map Coordinator. The production of the Special Support Branch shows a comparable situation to that of last year. The total Division man-hours expended for all HIS work is comparable with the FY 1956 period, while man-hours expended for Air Force E&E work is considerably higher. Training man-hours are above FY 1956 due primarily to an extended TDY of a person in Western Europe. Overtime this year is about 1,000 hours above the comparable FY 1956 period.

MONTHLY REPORT FOR THE MAP LIBRARY DIVISION

February 1957

1. Summary of Statistics for Receipts, Processing, and Disbursements of the Map Library Division, February 1957 (on next page).

2. The trend of ever-increasing activity in the Reference Branch culminated in a record month for February. 164 more map requests and 9,257 more maps were serviced than in the preceding month. In addition, 490 publications were forwarded to requestors. Requests for general information and inquiries handled by the Place Name Desk also mounted. The increase in general reflected the demands placed on the Map Library by CIA components and the Department of State.

3. During February, [redacted] 25X1A9a
of the Reference Branch, and [redacted] of the Procurement Branch, 25X1A9a
left the Agency and Government service.

25X1X4
25X1X4

4. Training programs were begun for [redacted] 25X1C
[redacted] and [redacted] 25X1C □

25X1A9a

5. [redacted] spent
2-1/2 days in consultation in Washington.

25X1A9a

6. [redacted] returned from
Moscow and was debriefed in the Library and Building 11.

25X1A9a
25X1A

7. [redacted] started a 10-day trip [redacted] 25X1A
[redacted] where he will brief OO/C contact specialists on the require-
ments of the Geographic Research Area, and assist in the exploitation
of several companies whose files show promise of yielding a good deal
of valuable material.

25X1X4

8. Background data and contact information has been obtained for
the [redacted] and arrangements
have been made for letters of introduction from the American head
offices to field headquarters [redacted]

25X1C

25X1C

9. Outgoing communications in February continued to be high. Of
a total of 193 items, 156 concerned foreign procurement at various
Foreign Service posts and foreign mapping agencies, while 37 related
to domestic correspondence.

MONTHLY REPORT FOR THE PHOTO INTELLIGENCE DIVISION
MONTH OF FEBRUARY 1957

1. ACCOMPLISHMENTS

1. Projects and Reports

a. During February the Division continued to focus its major effort on top priority projects for the DCI, DD/I, and DD/P areas. Three Photographic Intelligence Memoranda and one CS evaluation were issued. Much work was accomplished on projects and many substantive and technical consultations were held. Work accomplished is noted below by supported unit.

b. DCI, DD/I, and AD/RR: Special support was provided on Projects 70.159 and 70.210.

c. ORR, Geographic Area: A study concerned with agriculture development in Southeast China is expected to be ready for distribution early in March. The report on railroads in USSR and China as covered by [] photography is near completion and should be ready for distribution in the near future. Work was begun on Projects 70.259 [] and 70.260 [] both of which are concerned with map evaluation of strategic areas in the Communist Bloc. An assist has been provided in initiating a search for photography of a number of high priority target areas in the Far East. Work continues on Projects 72.237 [] and 72.204, "North Korean Urban Studies."

25X1A2g

25X1A2g

25X1A2g

f. OSI: Close liaison was continued. Much substantive work was accomplished. The report on the [] (Project 71.224) has continued to require extensive effort in preparation for final publication. Work was accomplished on Projects 70.250 [] and 70.251 []

25X1D2g

25X1A2g

g. OCR: Work continues on Project 70.253 "Metrical Analysis of Soviet Aircraft Plants."

h. DD/P: Division effort in support of DD/P requirements increased during the past month, primarily in the preparation of GP/I-246 [redacted] a memorandum concerned with railroad traffic on a Soviet rail line.

[redacted] (Project 70.248) has been submitted to the Naval Photo Intelligence Center for review and comments. Considerable progress was made and numerous technical consultations held on Project 70.221 [redacted] The evaluation of the [redacted] continues (Project 70.225). Work on Projects 70.256 [redacted] and 70.255 [redacted] has ceased pending further clarification of requirements from the requester. One CS evaluation was issued.

i. O/TR: An exhibit and briefing personnel were provided in support of the Intelligence Products Exhibit and a lecture was presented to the Intelligence Orientation Course.

2. Photographic Intelligence Training Program: Further presentations are temporarily suspended by pressure of work. Plans are being made to revise and lengthen the course providing training in geographic and tactical photo interpretation as well as industrial photo interpretation.

3. Administration and Planning: Considerable time was spent on administrative matters pertinent to the functioning and program development of the Division.

B. COORDINATION

1. [redacted] met with [redacted] to discuss the exploitation of [redacted]

2. [redacted] conferred on several occasions, with Air Force Photo Records and Services personnel concerning their photographic research service in an effort to come up with a comprehensive research aid for use by the Support Staff Researchers.

3. [redacted] consulted with [redacted] of DD/P concerning photographic requirements.

4. Three members of the Division entered on duty this month: [redacted] 7 February; [redacted] 12 February; [redacted] 18 February.

C. MISCELLANEOUS

1. [redacted] attended the National Resources Conference held in Jacksonville, Florida while on two weeks military leave.

~~SECRET~~

PROGRESS REPORT FOR THE GEOGRAPHY DIVISION
February 1957

I. ACCOMPLISHMENTS

A. Completed Work

Seven geographic intelligence reports, 5 G/E and G/I memoranda, and 3 G/S support jobs, as follows, comprise the work completed and issued by the Geography Division during February:

25X1A2g

CIA/RR-C-15 The Soviet Arctic

Requester

Self-initiated

CIA/RR-GR-126.1 (2nd report)

Kilometer Readings for Selected
Places along the Volga from
Moscow to Astrakhan

St/I/RR

The Soviet Arctic, CIA/RR-G-15, provides a geographic appraisal of developments and activities in the Soviet Arctic; in evaluating these factors, attention was given to economic and military considerations. Four evasion geographies were disseminated during February. CIA/RR-G-145, An Appraisal of Soviet Plans to Remain in the Antarctic after the IGY and of the Reported Establishment of a Submarine Base, was initiated at the request of ONE in fulfillment of a requirement by the Department of State in connection with its review of U. S. Antarctic policy. Thirty copies were reproduced by Ditto and distributed; later the report was reproduced by photolith -- 250 copies -- for dissemination to all interested (and eligible) persons. A briefing on Soviet intention in Antarctica -- G/I-217, was prepared for the DCI for an OCB meeting. G/E-61, Areal Extent of Zone of Restricted Travel in Rumania, was compiled to satisfy a request from the R Area of State Department, and in response a memorandum of commendation was received saying the report had aided in making a policy decision. G/E-62, Sovereignty Claims in the Gulf of Aqaba, also for the State Department, was prepared on short notice. G/S-15, A Selected Bibliography on the Waters of the Upper Nile, apparently accomplished its purpose of informing the DCI of the situation and the map coverage. Other completed work listed was of a routine nature.

B. Non-Scheduled Activities

1. Requirements: The Geography Division submitted the following requirements:

- a. ORR Cases 10498 (Syria) and 01508 (Iran)
- b. On the basis of evaluations of two CS reports, requirements on [] were submitted to ID/P.
- c. Requirements on North Vietnam, Laos, Cambodia, and South Vietnam were compiled for NSA.
- d. St/I Office Notice No. 104, [] Revisions.
- e. Requirements were sent to the [] for amplification of data from another source.
- f. Two extended requirements prepared by GG/X: 1) Revision of previous requirement for USGSC interrogation of a [] on Worden gravimeters in Yugoslav possession; 2) [] on the same problem.
- g. An appraisal of the value of Soviet Bloc geodetic catalogs and publications was prepared for another Office by GG/X after extended conversation with personnel of US Defense mapping organizations.

25X1C5a1

25X1C5a1

25X1C5a1

25X1X5a1

25X1A5a1

2. Evaluations:

- a. Self-initiated evaluation on [redacted]
- b. Self-initiated evaluation of Foreign Service Despatch, No. 270, AmLegation, Bucharest.
- c. Self-initiated evaluation on Rumania.
- d. An evaluation of [redacted] was prepared for EGR-12115.
- e. Two extended evaluations were drafted on [redacted] by GG/X. Revisions were incorporated to reflect recent background information.

25X1A2g

25X1A2g

25X1A2g

25X1A2g

25X1A9a

3. Other: [redacted] completed a second tour at [redacted] (three weeks during February). The substance of his report is as follows:

25X1X4

Valuable data have been obtained that fill intelligence gaps not only for the Geographic Area, but for all ORR and other offices of the Agency. [redacted] has pointedly illustrated the lack of competent area specialists in ORR. From observation, conversations, and direct contact with other members of the CIA unit [redacted] and following briefings and debriefings here in Washington, I am firmly convinced that country analysts of the Geography Division are most highly qualified to represent ORR interests within their areas of specialization. The geographer's overall knowledge (physical, industrial, transportation, sociological, and other subjects of an area) serves as an excellent basis for discussion, interview, and interrogation, as well as for observation in the field. He is not restricted by his field; on the contrary, his background enables him to fulfill intelligently not only geographic requirements, but those levied by all segments of ORR.

25X1X4

25X1C

25X1C

25X1C

[redacted] It is my firm conviction that ORR interests would be better served if the Geography Division would be "tapped" for its trained and certainly qualified personnel as ORR representatives.

An orientation program for new employees of the Intelligence Area, Department of State, was attended by two persons from the Geography Division. It is not felt that sufficient value accrued to warrant attendance at future meetings.

The Far East Branch reports the attendance at the debriefing of Mr. [redacted]

25X1X7

[redacted] but adds the following: We learned of this debriefing via the "grapevine" and had to make special arrangements to gain a seat. Representation has been made to St/I to reemphasize our interest in being notified of all such debriefing opportunities.

C. Progress of Work Under Way

The following are brief characterizations of work under way in the individual regional branches and staffs during February:

Editing and Review Staff: The work of this Staff is beginning to approach the normal, but most of the reports received for editing and review during the month were rush jobs with deadlines too short to permit thorough preparation for publication. The outstanding job of the month was the editing and review of CIA/RR-GR-145, an appraisal of Soviet accomplishments in the Antarctic and plans for the future. At the request of the AD/RR the report, which was issued first in ditted form, is being rerun in photolith edition with maps and photographs added in order to give it wider distribution.

Western Europe Branch: The ditto copy of Chapter IX, NIS 4, was reviewed and returned to the Coordination Staff. The draft of Area EG-4, [redacted] was completed and work on the maps continued. An article for the MR was completed, another was revised and circulated for comment, and three others are in process. Work on the [redacted] made considerable progress.

Eastern Europe Branch: A large portion of research time continues to be spent on [redacted] and this will probably continue to be the case even after the format of the requirement is changed in the near future. The Eastern Europe Branch is called upon to support more than its share of [redacted] returned from a second three-week stint [redacted] and this Division is committed to furnish another analyst for two weeks during late March. While it is gratifying to know that GG/E has the requisite talent to throw into the breach during an emergency like this, the operation makes a severe cut into the research time.

The Eastern Europe Branch prepared and submitted to the GM Committee outlines for two tentative GM articles: one on Poland's Recovered Territories and the other on Cyprus. The analyst on Rumania received a written commendation from the Department of State for a "quicky" memorandum that he prepared to facilitate the making of a policy decision in State. One Section 19, NIS, two G/E's (including the one to State), one G/I, and one G/S were prepared during the reporting month. Support was given to the final examination in OTR's course in map reading. Some time was spent by the Chiefs of GG/E and GG/W preparing for the amalgamation of the two Branches. [redacted] prepared previously, were published in February.

Western Hemisphere Branch: Status of Latin American Boundaries, PN 66.1257, was completed in the branch and turned in to the Division Chief during February. Significant progress was made on PN 66.1470, Petroleum Potential in Latin America, and [redacted] fully expects to complete his research on this self-initiated study during March. All the major oil-producing countries in Latin America have been accounted for, and the remaining time will be spent on the minor producers and on a summary chapter. Answers to the requirement sent to all State posts in Latin America, for PN 66.1185, are beginning to come in and contain much valuable information

concerning railroads in Latin America. [] has been on sick leave. Plans for [] scheduled area familiarization trip are getting under way.

Near East/Africa Branch: The chief effort for the month went into the completion of two priority projects. A Bibliography of the Upper Nile for the DD/I required considerable overtime, but apparently it accomplished its purpose of informing the DCI of the situation and the map coverage. Sovereignty Claims in the Gulf of Aqaba went to the State Department Legal Adviser and the Navy JAG. Some progress was made on the [] and considerable time was spent in checking and working with Map 25338 of the Arabian Peninsula. The coordinator and responsible analyst worked on the multitude of additions and changes in Chapter IX, NIS 27, Turkey. The standards of OBI apparently call for considerable repetitious listing. The study on [] a potential GM, was presented to AD/RR on 18 February.

USSR Branch: The Volga-Urals Study, CIA/RR-G-16, and the Urban Area Study: Tomak, CIA/RR-GR-144, were forwarded to Reproduction. Additional information in connection with the previously completed [] was forwarded to the requester as CIA/RR-GR-126.1. Two G/S jobs were completed. The map exercises for the Office of Training were transmitted, and two members of the Branch assisted in the evaluation of their presentation. Work continues at a good pace on the Territorial-Administrative Divisions of the USSR, the two [] of the USSR-SW European Region, Current USSR Railroads, [] Some work was done on the [] during the month, and an article on Recent Accessions of Soviet City Plans is being circulated for review prior to inclusion in MR-52. Possibilities for a G/M are being explored on physical reconstruction of the economic regions of the USSR as currently suggested by Khrushchev. [] completed the ORR 9-month intensive Russian course.

Coordination Staff: Work on Chapter IX, NIS 12^M, Finland, is progressing, although it is anticipated that considerable overtime will be required to finish the coordination, typing, and proofreading in order to meet the 31 March deadline. All material for NIS 27, Turkey, is now on hand. The AMS-MGB contribution, which is classified Top Secret, was not received in CIA until 18 February and was not received in GG/C from Top Secret Control until 27 February. Because this contribution was more than 4 months overdue and because of the problems encountered in processing a contribution with the TS classification, the Chapter probably will not be forwarded to OBI until May. Work on the Chapters IX for 41B^M and 41A^M, South and North Korea, have been assigned to the same coordinator so that problems common to both studies can be worked out simultaneously.

The AMS-MGB contribution to Section 19 of NIS 27, Turkey, was received in GG/C on 21 February, 4 days prior to the date the coordinated Section was due in OBI. In addition, OBI wishes to examine the portions that require a TS control to determine if it will be possible to sanitize the material. A memorandum was forwarded to ACSI on 21 February requesting that they identify the parts that are TS. It is expected, therefore, that this Section 19 will be 2 to 3 weeks overdue at OBI -- the first deadline this fiscal year that has not been met.

25X1C Far East Branch: Solid progress was made on a number of major projects during February. Text of the Tibet Border Study, PN 61.1238, is undergoing Branch Chief review; the Regional Analysis of Northeast Thailand, PN 61.1380, is complete in draft form except for the introduction; work continued on the Geography of Sinkiang, PN 61.1212; [redacted] 61.1359, neared completion; and good progress was made on two [redacted] areas. One new major project was initiated, involving analysis of six selected areas in Indonesia. In view of its high priority, two analysts have been taken off other projects to work on the Indonesia job.

25X1A2g Soviet Mapping Intelligence Staff: Work on Antarctica was considerably increased following [redacted] report of Soviet submarine base construction. A Department of State (R Area) request to ONE for an NIE on Soviet intentions and on the validity of the reported construction was converted into an ONE request on D/CG to prepare an estimate in lieu of an NIE -- CIA/RR-GR-145. A briefing on Soviet intention was prepared for the DCI for an OCB meeting -- G/I-217. As an outgrowth of the D/CG estimate, a draft memorandum was prepared for high-level use in the strengthening of intelligence surveillance in Antarctica. Other work included the drafting of a briefing for the [redacted] Two extensive requirements were prepared relative to the problem of Soviet Bloc capabilities in gravimetry, and an extended evaluation was prepared of a CS report on the [redacted] participated in the organization of an informal intelligence group on the IGY.

II. RELATIONSHIPS OUTSIDE THE GEOGRAPHIC AREA

25X1X7 The possibility of including graphic illustrations with the NIS Sections 19 of Chapter I has been considered for some time, and the subject has also been raised at several of the Chapter I meetings held at OHI. It was agreed at the 20 February Chapter I meeting that an ad hoc committee would be appointed to study the problem and that a report of the findings would be made at a later meeting. The committee is to be selected by the Chief of the Coordination Staff, D/CG, and will probably include [redacted] OHI, and the Chapter IX Subcommittee members from AMS-MGB, AGIC, and HO-Charts.

25X1C On the unconventional warfare projects [redacted] at a JCS meeting held on 26 February a decision was reached among the various agencies participating in U/W planning that has caused us to plan to complete the work on those areas currently under way, but to initiate no work on additional areas until the new, fully coordinated inter-agency list of selected areas has been agreed upon as a basis for planning. In this connection, [redacted] visited the Far East Branch concerning the work done on Tibet and expressed extreme satisfaction with the Part I submitted last month.

25X1X7 The future of the evasion geography program may be affected by the forthcoming revised unconventional warfare program mentioned above.

25X1A9a During January and February the regional branches of the Division prepared exercises in the use of maps in intelligence for the Office of Training's new course Intelligence Research (Maps), and [redacted]

25X1A9a [redacted] sat in on the examination period in which the exercises were used for the purpose of evaluating the students. The Director of Training forwarded to AD/RR a memorandum of commendation for the assistance given by personnel of the Geographic Area.

Good responses were received in answer to the requirement laid on all US embassies in Latin America for additions and corrections to the preliminary edition of Map 13886, Railroads in Latin America, our PN 66.1185. The responses have furnished valuable information not available elsewhere. Most of the answering despatches have indicated a desire for copies of the final version for use in the embassies and for distribution.

Through the joint efforts of OSI and AFOIN LEL (ATIC) an adhoc subcommittee was formed to coordinate all phases of intelligence interests of the US government in the IGY program, its operations, and its results. Membership will be broadened to include OO/C, Army, and Navy. It is further intended not to formalize the group as an IAC unit, but rather notify the IAC, through the USAF member, of the existence and functions of the group and its availability to consider and advise the IAC on technical problems. The next meeting will be 6 March. [redacted] is the ORR representative on this committee.

III. ADMINISTRATION

25X1A9a [redacted] reported for duty in the Division during February.
25X1A9a [redacted] have been given NIS Chapter IX coordination assignments that will help to alleviate the end-of-the-fiscal-year rush.
25X1A9a [redacted] spent two weeks of military leave during the month on an active assignment with AFOIN that involved an AF staff study on IAC activities in the procurement and exploitation of Chinese Communist publications.

25X1A9a The Division is in receipt of copy of memorandum of 25 February from [redacted] commending [redacted] and his staff on the work performed in connection with CIA/RR-GR-126.1, 130 and 141.

25X1X7
5X1X7 The Division Chief departed on 28 February to attend the [redacted] [redacted] Earlier in the month he gave two training lectures, for Clandestine Services Review and the Intelligence Orientation Course.

Microfilming of the USSR Branch files was completed, and that of the Far East files is nearing completion. The Eastern Europe Branch files are next on the schedule, to begin about the middle of March.

Area familiarization travel by D/GG personnel is under discussion.

The Division welcomes the news regarding the investigation of the CIA Library. More and more the Division finds it necessary to rely on its long-term collection policy to provide both basic and current information.

Reorganization of D/GG is being effected gradually.

IV. PROBLEMS AND RECOMMENDATIONS

The Near East/Africa Branch reports:

While ORR has reduced the slots available for study on Africa, the DCI has found it desirable to send [] on a three-month orientation tour of tropical Africa. More than one newscaster has called this continent "a major objective in the cold war."

In December 1956, GG/N noted the marked increase in Soviet interest in Africa both from a political policy standpoint and from an academic viewpoint. The Soviet Union did not separate these viewpoints, but integrated them into a new policy which has been implemented with speed and precision to deny Africa to the West. This Agency has partially reacted to this threat;

[] [] [] In sharp contrast, Soviet research effort has greatly expanded, and 9 Russian African institutes are being established. Egypt has been chosen as the front door for this parade of influence, and the Egyptian people will be a convenient mask for the effort. The Oriental Section of the Leningrad University Library followed up its previous shipment of volumes of Chinese, Indian, North Vietnam, Mongolian, and Afghani published materials with a donation of over 2,000 modern scientific books to Cairo University.

In Ethiopia the Armenians have mingled and intermarried with the Ethiopians for several generations and have woven themselves deep into the Ethiopian scene.

It is recommended that a complete reexamination of the DD/I research effort on Africa be made immediately. It is not too late for a survey of US intelligence needs on Africa and the inauguration of a first-class research effort instead of an apologetic dabbling after the Soviets have won.
